Not sure about the status of 915055B and 915055C before they were merged in 1990, but I agree with the overall 915055 first being listed in March 1990 (TCC was sent an owner notification letter on 3/30/1990).

Based on some of the old correspondence files it looks like the merger of the sites into 915055 (as a Class 2) was first contemplated in 1987, with the first paperwork I have found for this being 5/22/1989. The purpose stated for the combination was to 1) avoid the confusion with the site numbers, and 2) facilitate a full RI/FS of the plant site.

**Subject:** RE: TCC Registry Listing

The three OUs (915055A, 915055B and 915055C) were merged as one class 2 site 915055 on 3/16/90.

915055A was reclassified from 2a to 2 on 12/15/87.

C915055B and C915055C became a 2 when they were merged with 915055A in 1990.

At least that is my understanding.....Ben do you agree with this?

Clear as mud right!

Hi Terri,

Do you happen to know the date that DEC listed the TCC Site in the State registry as a Class 2 site? The year 1990 has been used in a few DEC docs, but I can't find the exact date.

Many thanks,  
Margo
